

Surround your turf with the power of fluoxastrobin

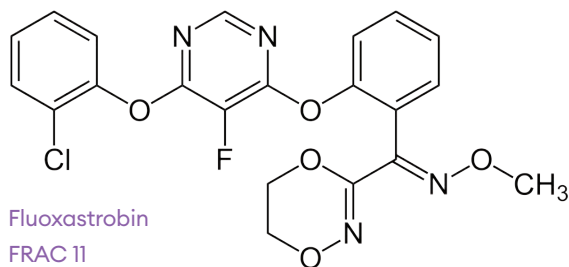

"Applying Fame® SC fungicide first was the difference-maker in my fungicide program. It controlled my toughest Pythium root dysfunction issues. Fame SC will always be the foundation in my fungicide program."

Jeff Lee

Superintendent, Valley Hill Country Club, Huntsville, AL

What is Fame® SC fungicide?

Fame SC is powered by fluoxastrobin, the most advanced strobilurin (FRAC 11) on the market. This fungicide is unique among the strobilurin family for its 15-minute rainfastness, dollar spot suppression, and rapid xylem and translaminar movement. Fame SC delivers excellent results on brown patch, fairy ring, summer patch and Pythium root dysfunction. The addition of a fluorine atom on its chemical structure means quicker uptake and even distribution within the plant. Add all of these together and you get a product that delivers superior disease control and healthier turf.

Key benefits

Rapid mobility and rainfast within 15 minutes

- + Rapid xylem and translaminar movement
- + FRAC 11 fungicide

Key diseases

- + Brown patch
- + Fairy ring
- + Summer patch
- + Pythium root dysfunction
- + Dollar spot (suppression)

Labeled use sites

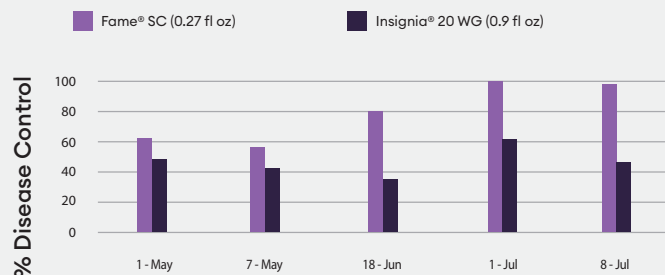

- + Golf courses
- + Sod farms
- + Commercial lawns
- + Athletic fields
- + Residential lawns
- + Commercial sod farms
- + Institutional lawns

The power of fluoxastrobin

Fame® SC fungicide works by interfering with respiration in plant-pathogenic fungi and is a potent inhibitor of spore germination and mycelial growth. The active ingredient, fluoxastrobin, moves rapidly into roots and green tissue via translaminar and xylem movement. The molecular design of fluoxastrobin, with its unique fluorine structure, provides increased leaf systemcity, resulting in more uniform leaf distribution.

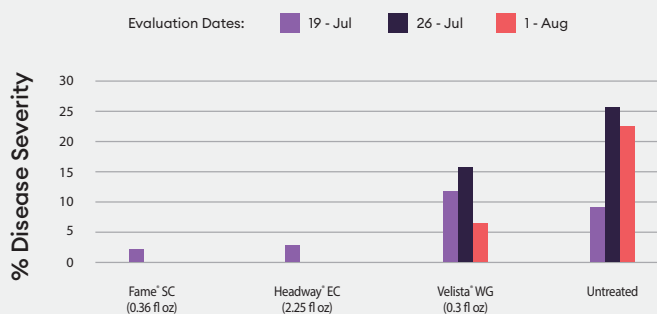

Fame® SC Pythium Root Dysfunction Control on Bentgrass Green

Rates are oz/1,000 sq. ft.

NC State University 2008-2009
Fame SC: four applications; two-week intervals
Insignia 20 WG: three applications; three-week intervals

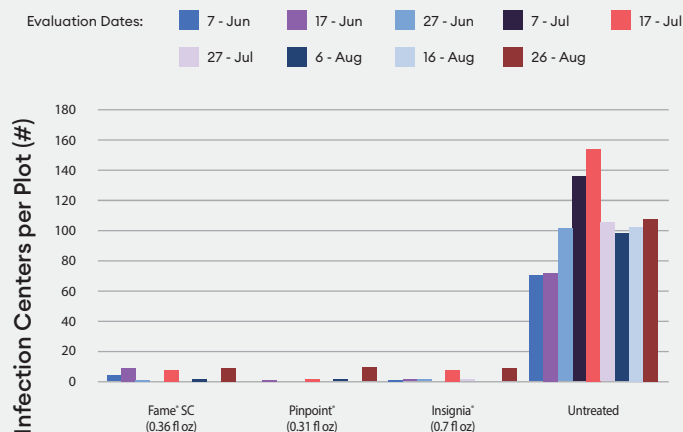

Fame® SC Curative Brown Patch Control

Treatment (oz/1,000 sq. ft.)

T. Hicks, Ohio State University
Initial application: July 19, 2017
Creeping bentgrass fairway
21-day interval for all treatments except Velista WG (14-day interval)

Fame® SC Dollar Spot Control

Treatment (oz/1,000 sq. ft.)

Bruce Clarke, Ph.D., Rutgers University
Initial application: May 18, 2021
Colonial bentgrass greens
Treatments applied on 14-day intervals
Seven applications

Fame SC is an excellent component of fungicide programs targeting the most difficult-to-control soilborne fungal diseases like fairy ring.
