FIFRA 2(ee) Recommendation

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF TX

Velpar DF VU

EPA Reg. No. 101563-187

For the tank mix application of Velpar DF VU plus Oust XP for weed control or suppression only in forestry sites for the establishment of shortleaf, loblolly, longleaf, or slash pine.

FIFRA Section 2(ee) Recommendation: This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA. This product bulletin should be in the possession of the user at the time of application of the product. All applicable directions, restrictions and precautions on the EPA registered label are to be followed.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its label. Velpar DF VU may be mixed with Oust XP at the rates listed in the table below to expand control or suppression of target weed species listed on those product labels. Oustar rates are listed as reference. Applications may only be made to forestry sites where shortleaf pine, loblolly pine, longleaf pine, or slash pines are to be established through site preparation or release applications. For establishment of shortleaf pines, only use Velpar DF VU at a rate of 8.4 to 10.1 oz/A mixed with Oust XP at a rate of 1.6 to 1.9 oz/A (equivalent to 10-12 oz/A Oustar).

Applications should be made prior to, or just after, weed emergence for optimal control. Rainfall is needed to incorporate herbicides into the soil for best results. Follow all additional directions on the Velpar DF VU and Oust XP labels. Note that lower rates should be used on coarse-textured soils while higher rates should be used in fine-textured soils.

Velpar DF VU Rate (oz/A)	Oust XP Rate (oz/A)	Equivalent Oustar Rate (oz/A)
8.4	1.6	10
10.1	1.9	12
10.67	2.0	12.67
13.5	2.5	16
16	3.0	19
