

Targeted control for sensitive areas

When precision matters, Entune™ Quinclorac provides effective, targeted control to help you tackle weed challenges in sensitive areas – without compromising desirable forage. It's an environmentally conscious approach that minimizes impact on desirable vegetation, allowing you to manage sensitive areas with confidence.

Key benefits:

- + Provides targeted control in sensitive areas
- + Low impact on desirable vegetation
- + Less injury to desirable trees and shrubs
- + Lower use rate compared to Facet® L

What it helps control:

- + Leafy spurge in the West
- + Crabgrass and foxtail species in the East and South
- + Knotroot foxtail in the South

Labeled for use on:

- + Rangeland
- + Pasture
- + Conservation Reserve Program (CRP) land
- + Grass grown for seed
- + Non-crop areas
- + Environmentally sensitive areas, including sites near rivers and streams

How it compares to the competition:

Weed Challenge	Entune Quinclorac Use Rate	Facet L Use Rate
Grass and broadleaf control (East)	8–12.5 fl oz/A	22–32 fl oz/A
Bindweed control	8 fl oz/A	22–32 fl oz/A
Bindweed maintenance	4.5 fl oz/A	12 fl oz/A
Leafy spurge control (West)	12.5–25* fl oz/A	32–64 fl oz/A

*Suppression only; should be tank-mixed with dicamba-containing product for effective control.
