

# Proven bed bug solutions

An integrated program for today's toughest infestations.

Bed bugs are a persistent and emotionally taxing pest that place intense pressure on customer satisfaction, business reputation and service performance. As infestations increase across residential and commercial environments, Pest Management Professionals need solutions that deliver reliable control, operational flexibility and confidence at every account.

Envu™ provides a comprehensive suite of proven tools to help professionals protect their customers – and their reputations – even in the most challenging bed bug situations.

#### Resistance Pressure

Evolving populations demand dependable solutions

#### Hidden Harboursages

Difficult-to-reach areas challenge thorough control

#### Rapid Spread

Movement between units, rooms and accounts

#### Zero-Tolerance Expectations

Customer and brand reputation at stake

## Temprid<sup>®</sup> SC insecticide

### A cornerstone solution for bed bug control

When increased efficacy, ease of use and flexibility are critical, Temprid<sup>®</sup> SC insecticide is the product Pest Management Professionals rely on. Temprid SC is widely recognized as a leading solution for bed bug infestations and is trusted by professionals to control hard-to-eliminate pests.

#### Key features and benefits:

- Dual-active formulation containing **imidacloprid** and **β-cyfluthrin**
- Two distinct modes of action for enhanced performance
- Controls **all stages of bed bugs**, including eggs
- Highly effective against **pyrethroid-resistant populations**
- Provides residual control **for up to six months on various substrates**
- Broad pest spectrum, controlling more than **20 structural pests**

This dual-action approach delivers powerful, dependable bed bug control that Pest Management Professionals can count on when infestations demand proven performance.

## Suspend® PolyZone® insecticide

**A durable solution where pyrethroid resistance is not a concern**

Suspend® PolyZone® insecticide is a single-active insecticide containing **deltamethrin**, a Group 3 pyrethroid, formulated with proprietary PolyZone technology. This formulation helps protect the active ingredient from environmental stressors such as **water, heat, grease and mechanical abrasion**.

### Why choose Suspend PolyZone:

- Labelled for control of bed bugs and other structural pests in Canada
- Durable residue suitable for a wide range of indoor environments
- Flexible application options including **crack-and-crevice and spot treatments**
- Suitable for accounts where pyrethroid resistance is not present
- Reentry permitted once treated surfaces have dried (see label for full details)

Suspend PolyZone offers an effective and flexible option for Pest Management Professionals managing susceptible bed bug populations in residential or commercial accounts.

## Drione® dust

**Long-lasting desiccant control for targeted bed bug harbourages**

Drione® is a desiccant dust registered for control of bed bugs and other structural pests in commercial and industrial settings, including use in food areas as a crack-and-crevice treatment.

The formulation combines **natural pyrethrum** with **amorphous silica gel**, creating multiple modes of action. Drione erodes the insect cuticle, causing pests to die from dehydration.

### Key advantages:

- Controls bed bugs and other listed pests
- Remains effective **up to six months when left undisturbed**
- Ideal for voids, cracks, crevices and protected harbourage zones
- Broad indoor use label, including **limited application on furniture** such as mattresses, box springs, bed frames and picture frames (refer to label for specific use directions)

Drione is an excellent complement to liquid insecticides, reaching areas where sprays may not be practical or effective.

## A total bed bug solution from Envu™

By combining powerful liquid insecticides with long-lasting and targeted dust formulations, Envu™ provides Pest Management Professionals with a **complete toolkit** for professional bed bug management. Whether addressing heavy infestations, resistant populations, or ongoing maintenance programs, Envu products help support effective, confident decision-making.
