

Enhance your business with the mosquito solution that works overtime to reduce callbacks

Suspend® PolyZone® insecticide is the strong choice for lawn care businesses looking to offer mosquito control. It keeps working for up to 90 days thanks to a polymer barrier that protects the active ingredient even in harsh weather conditions. It's a core solution that reduces time-consuming callbacks to keep your lawn care business on track.

Discover how Suspend PolyZone insecticide can boost your lawn care business.

Your core solution for long-lasting mosquito control

- + Ends the breeding cycle by providing up to 90 days of control
- + Polymer barrier protects against weather, UV exposure, irrigation and abrasion
- + Mosquitoes are exposed to the active ingredient when they land on treated surfaces

Deltamethrin delivers highly effective mosquito control

- + Effective against more mosquito species, including those resistant to Type I pyrethroids
- + Long-lasting control delivers better results and reduces callbacks
- + Controls many other insects including ants, cockroaches, spiders and ticks

Spray, then scout

Mosquitoes need water to reproduce, so scouting for even small amounts of standing water is a key part of delivering effective control. Inspect properties for:

- + Children’s toys, including sandbox toys
- + Overwatered container plants
- + Watering cans, buckets and birdbaths
- + Low or marshy places in the lawn or planted beds
- + Gutter drainage points
- + Leaky faucets, hoses or irrigation spouts
- + Open garbage bins and lids
