envu™ Professional Pest Management

Discover the powerful difference a blended formula makes for bedbugs and other tough pests

- + Consistent exposure to two active ingredients delivers superior control of over 50 pests
- + Transfer effect means faster results for ants and other social insects
- + Eliminates pyrethroid-resistant bedbugs and their eggs
- + Compatible with heat treatments and can prevent bedbug infestations for up to six months

Temprid® FX insecticide controls the most resistant bedbug strains

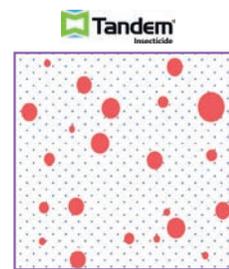

In these illustrations of a treated surface, the pyrethroid is represented by PINK and the CNI is represented by BLUE.

With Temprid FX insecticide, >200,000 equal-sized particles of β -cyfluthrin and imidacloprid per square inch

With Transport® GHP insecticide, ca. 10,000 bifenthrin particles per square inch in a field of acetamiprid molecules

With Tandem® insecticide, >10,000 λ -cyhalothin microcaps per square inch in a field of thiamethoxam molecules

Key pests controlled

- + Ants
- + Bedbugs
- + Cockroaches
- + Scorpions
- + Spiders

Key benefits

+ Dual-action technology

Co-milled formulation ensures pests are evenly exposed to both AIs for results that can't be guaranteed when two products are simply mixed together

+ Value for you

Proven in studies to reduce callbacks for ants by over 50%*, which means you keep customers happy while saving time and money

+ Flexible label

Controls insects in more places, including indoors, outdoors and on non-blooming plants

+ Ready-to-spray option

Bag-on-valve technology combines the proven results of Temprid FX insecticide in a spray can that works even upside down
