

Durentis™ Insecticide Grub Assurance Program

Prevent grubs without stress: Envu™ has you covered

Purchases of Durentis™ insecticide (16 fl oz and 64 fl oz only) are eligible for the Durentis Assurance Program.

How it works:

- Apply Durentis insecticide at the 2.7 fl oz rate while following all label application instructions for white grubs.
- Application must be made during April 15 - June 30 each year.
- Follow all application directions on the Durentis label (Section 3).
- For optimal control of white grubs administer 0.1 - 0.2" of irrigation soon after application.
- In the event of a breakthrough, an Envu Area Sales Manager will determine the appropriate rescue treatment product and decide whether a spot or broadcast application is necessary, and when it should be applied.
- The Durentis Assurance Program does not apply to Durentis on Fertilizer.
- Contact your Envu Area Sales Manager for more information.

All claims must be filed by October 15 each year. This Assurance Program is limited to providing one recovery application per property, up to the total acres originally treated. Envu reserves the right to investigate any product performance complaint, verify purchase records, and modify or discontinue this program at any time without prior notice. Proof of purchase is required.
