

Introducing Portfolio® IVM

AI
Sulfentrazone

Size
2.5 Gallons

Application Rate
8-12oz/Acre

Key Benefits:

- + Delivers both pre and postemergence control.
- + Protects grass in selective roadside applications and newly seeded areas.
- + Added power against hard-to-control species in both spring and fall programs.
- + Supports resistance management by introducing an additional mode of action.
- + Delivers residual control for ongoing protection.
- + Enhances performance of Esplanade®, Method® and Plainview® programs.

Weeds controlled

- + Kochia
- + Palmer Amaranth
- + Russian thistle
- + Pigweeds
- + Nutsedge species
- + **Over 30 labeled species**
