

# Product Information Sheet

- Active Ingredient: Indaziflam 0.0224%
- WSSA Group: 29
- EPA Registration Number: 432-1523
- Signal Word: None
- Formulation: Granule
- REI: 12 hours

**Marengo® G preemergence herbicide combines long-lasting, broad-spectrum weed control with an outstanding granular carrier for use on over 260 ornamental crops.**

## Best Uses

- Apply over the top of dry foliage to selectively prevent many broadleaf weeds, grasses and annual sedges
- Apply in fall for continuous weed control into the following growing season
- Control difficult weeds such as eclipta, bittercress, groundsel, oxalis, marestail, spurge, crabgrass and annual bluegrass

## Attributes

- Up to 8 months of residual weed control
- Reduces labor costs with fewer applications and less clean up work
- Verge® carrier provides dust-free application with uniform particle distribution
- Excellent plant safety
- Unique mode of action makes it ideal for rotation and resistance management
- No signal word
- Label allows for trial on plants not listed as tolerant

## Application Rates

- For production ornamental applications, use 125-200 lb./A
- For non-selective broadcast applications, use 200-400 lb./A
- Marengo G is available in 50-lb. bags
